***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 03-159674 in view of JP 09-044246.

JP '674 disclosed a toy vehicle comprising a movable body for being moved on a field member (5) which having a plurality of protruding objects (3); a magnetic guiding body C; the field member also having a mat A, a cover B, at least one protruding member (8) protruding from the surface of the mat. It is noted that JP '674 failed to teach the use of the remote controller, and the detecting unit in the vehicle as set forth in these claims. However, JP '246 disclosed a remote controller for controlling the operation of a moving body moving along a surface with a substrate body, the substrate body is differentiated based on a specific physical characteristic, the moving body having a detecting unit for judging the variation in the physical characteristic of the substrate, a drive mechanism controlling the moving body to perform the corresponding operation according to the table contents. Therefore, it would have been obvious to one of ordinary skill in the art to modify the toy vehicle of JP '674 with the teachings as discussed above of JP '246 for the purpose of providing the user more control over the toy vehicle.
